QUICK GUIDE

Thank you very much for purchasing the Panafax UF-744/788.

The UF-744/788 is one of the most advanced models in the Panafax family of G3 compatible, desktop facsimile machines.

301030001 Some of its many features are

- | | | |
|-----------|---|--|
| 301990001 | 1. Plain Paper Printing | Plain paper printing means you can easily write on received documents with a pen or pencil. Documents do not curl, making filing easier. In addition, plain paper does not fade, making it ideal for long term storage of important documents. |
| 301990015 | 2. Quick Scanning | The UF-744/788 Quick Scan speeds up the fax process by scanning and storing documents into memory in about 3 seconds* per page. (* UF-744 : 6 seconds)
This means that you no longer have to wait around until a transmission is completed before retrieving your documents. |
| 301990003 | 3. Easy Maintenance | Maintenance requires only changing a toner cartridge, making it quicker and easier than with other types of plain paper fax machines. |
| 301990016 | 4. Memory Function | A standard image memory feature allows you to store up to standard 35* pages into the document memory. After the UF-744/788 stores your documents, it can send them to selected station(s) automatically. You do not have to wait until the transmission ends before retrieving your originals. (* UF-744 : 32 standard pages) |
| 301990005 | 5. Dual Access Operation | The UF-744/788 can reserve the next transmission even during reception or memory transmission. It can also receive during document storage. |
| 301990006 | 6. 64 level Panasonic Super Gray Scale | The UF-744/788 offers a 64-level Super Gray Scale using Error Diffusion technology. Switching to this mode assures clear, realistic reproduction of photographs and text, brochures, and illustrations. |
| 301990007 | 7. Panasonic Super Smoothing | The UF-744/788 Incorporate's a new sophisticated Image processing technology to enhance the print quality of an ordinary received fax image by smoothing out the curving edge of a character to reproduce a high quality document. |
| 301990008 | 8. Selective Reception | To prevent unwanted faxes from being received by comparing the ID Number of the transmitting machine with the telephone number stored in the built-in automatic telephone dialer.

With a little practice, anyone can learn how to use the most popular features of the UF-744/788. |
| 301990011 | | This User's Guide will help you to use your UF-744/788 quickly and easily. The Table of Contents shows where to find information on each feature. Although we recommend that you review each section briefly, it will only be necessary to read the sections that contain the feature(s) you will be using. |

000000001

00000000 This page is intentionally left blank.

Note: For some countries, the handset may not be available because of the country's regulation or specification.

Control Panel

ORIGINAL

Used to set Normal, Light, or Dark. (see page 41) Also serves as an arrow key (<) to move the cursor over recorded numbers and characters.

RESOLUTION

Used to set Standard, Fine, Super-Fine. (see page 41) Also serves as an arrow key (>) to move the cursor over recorded numbers and characters.

HALFTONE

Provides OFF, QUALITY or FAST settings for halftone documents. (see page 42)

STAMP

Used to turn the verification stamp ON or OFF. (see page 42)

ON LINE

Blinks when the machine is transmitting a document or receiving.

PAPER JAM

PAPER JAM Lamp

Blinks when a recording paper jam occurs. (see page 133)

NO TONER

NO TONER Lamp

Blinks when the toner has run out. (see page 16)

NO PAPER

NO PAPER Lamp

Blinks when recording paper cassette is empty or not installed. (see page 18)

LCD Display

Indicates date and time, or the current operation.

HALFTONE

TONE

PAUSE/REDIAL

ABBR

FLASH

Used for Manual Number Dialling, recording phone numbers, and selecting functions.

TONE

Used to temporarily change Dialling Mode to Tone when Pulse mode is set.

PAUSE/REDIAL

Used to enter a pause when recording or dialling a telephone number, or to redial the last dialed number. (see page 58)

ABBR

Used to start Abbreviated Dialling. (see page 47 and 54)

FLASH

Used to access some features of your PBX.

STOP

Used to cancel operations. When it is pressed, the machine will return to standby.

TEL/DIAL

Used to start On-Hook Dialling or to make voice contact request. (see page 51 and 64)

CLEAR

Used to erase the previously entered input. Also used to adjust monitor volume. (see page 23)

MONITOR VOL

Control Panel

MANUAL
RCV

Used to select either manual reception or automatic reception. (see page 59)

DIRECTORY
SEARCH

Used to search for a station name (see page 48 and 55)

MEMORY

Used to select either memory or direct ADF communication. (see page 44 to 55)

FUNCTION

Used to start or select the function and sub-functions. These functions are explained in detail on the next page.

^
v
(Scroll Keys)

Used for followings.

- Search station name for Directory Search Dialling
- Confirm entered station for multi-station communication.
- Confirm current communication modes (e. g. Page number, ID, Dialed Telephone number) when unit is on line.
- Select functions.

One-Touch Keys (01-32)

Used for One-Touch Dialling. (see page 46 and 53)

Program Keys (P1-P8)

Used to record long dialling procedures or Group Dialling Number keys. (see page 70 to 75)

Character Keys

The One-Touch Keys and Program Keys also serve as character and symbol input keys which are used to record your LOGO and station name. The character key template is printed on the panel under the directory sheet cover.

Directory Sheet Overlay

Note: Whenever One-Touch keys are changed to the character key mode (to record your LOGO and station names), use the UPPER/LOWER key to switch between upper and lower character set.

MONITOR
VOL SET

Used to set operations. Also used to adjust monitor volume. (see page 23)

COPY

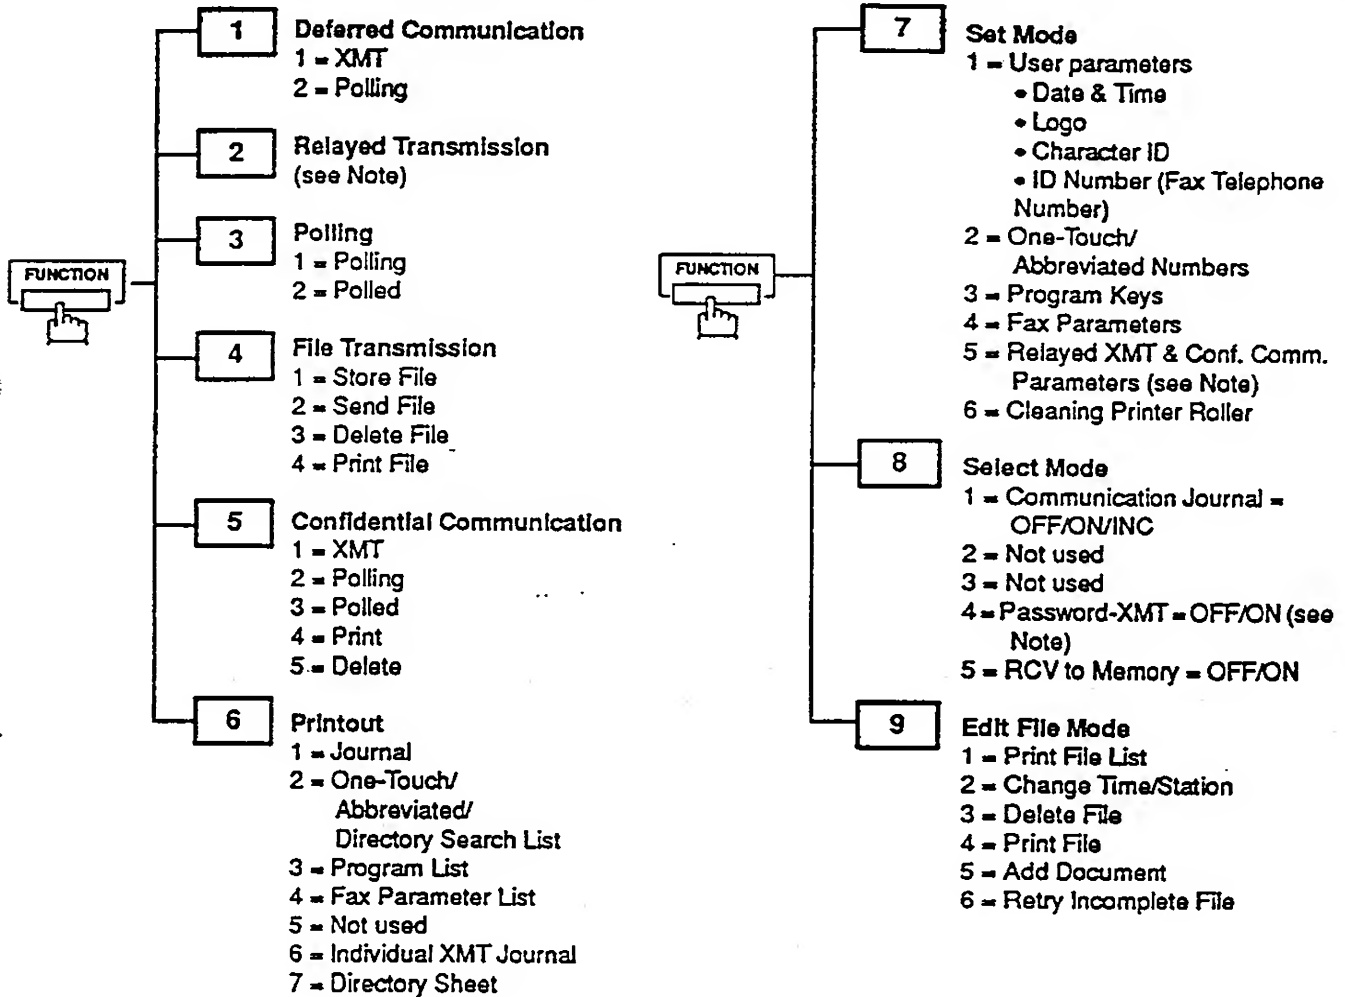

Used to make photo copies. (see page 63)

START

Used to start operations.

Function Key

Any function can be started by first pressing **FUNCTION** and then enter the function number, or by pressing **▲** or **▼** scroll key repeatedly until the desired function appears on the display.

Note: If Fax Parameter is not preset to Valid position, which enables you to use the function, the display will not show the function.

Safety Information

WARNING

denotes a potential hazard that could result in serious injury or death.

- TO PREVENT FIRE OR SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR ANY TYPE OF MOISTURE.
- TO MINIMIZE THE POSSIBILITY OF SHOCK OR DAMAGE TO THE MACHINE, IT MUST BE PROPERLY GROUNDED.
- THIS PRODUCT CONTAINS HAZARDOUS RADIATION. IF YOU DO NOT FOLLOW THESE INSTRUCTIONS OR USE CONTROLS, MAKE ADJUSTMENTS OR PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN, YOU MAY EXPOSE YOURSELF TO HAZARDOUS RADIATION.
- WHEN YOU OPERATE THIS EQUIPMENT, THE SOCKET-OUTLET SHOULD BE NEAR THE EQUIPMENT AND BE EASILY ACCESSIBLE.
- MAKE SURE THAT THE MACHINE IS INSTALLED IN A SPACIOUS OR WELL-VENTILATED ROOM SO AS NOT TO INCREASE THE AMOUNT OF OZONE IN THE AIR. SINCE OZONE IS HEAVIER THAN AIR, IT IS RECOMMENDED THAT AIR AT FLOOR LEVEL BE VENTILATED.
- PLUG POWER SUPPLY CORD INTO ORDINARY AC OUTLET BEFORE CONNECTING TELEPHONE LINE CORD. DISCONNECT TELEPHONE LINE CORD BEFORE UNPLUGGING POWER SUPPLY CORD FROM AC OUTLET.
- DISCONNECT THE EQUIPMENT IMMEDIATELY SHOULD IT EVER SUFFER PHYSICAL DAMAGE WHICH RESULTS IN THE INTERNAL PARTS BECOMING ACCESSIBLE IN NORMAL USE. IN THIS INSTANCE USERS SHOULD HAVE THE EQUIPMENT REPAIRED OR DISPOSE OF.
- IF THE POWER SUPPLY CORD AND/OR TELEPHONE LINE CORD OF THIS EQUIPMENT ARE DAMAGED, THEY MUST BE REPLACED BY THE SPECIAL CORDS SUPPLIED BY AN AUTHORIZED PANASONIC SERVICE CENTRE.

CAUTION

- 1 When you know that a thunderstorm is coming, we recommend that you:
 - (1) Unplug the telephone line cord from the phone jack.
 - (2) Turn off the power and unplug the power supply cord from AC outlet.
- 2 This equipment may not necessarily provide for the effective hand-over of a call to or from a telephone connected to the same line.
- 3 The operation of this equipment on the same line as telephones or other equipment with audible warning devices or automatic ring detectors will give rise to bell tinkle or noise and may cause false tripping of the ring detector. Should such problem occur, the user is not to contact telecom (telephone company) faults service.

Safety Information

⚠ CAUTION

denotes hazards that could result in minor injury or damage to the machine.

Do not install the machine near heating or air conditioning unit.

Avoid exposure to direct sunlight.

Install the machine on a flat surface, leave at least 10 cm of space between the machine and other objects.

Do not block the ventilation openings.

Do not place heavy objects, or spill liquids on the machine.

302000001

Main Unit and Accessories

Unpack the carton and check that you have all accessories illustrated.

302090001

302070003  **Note:** Available as an option for the UF-744. See page 147 for the order number.

00300001 Installing the Accessories

003990009

Final Installed View

Recording Paper Tray

Insert the projections into the square holes on the top of the machine.

Recording Paper Sub-Tray

Hook the bosses into the holes on the top of the machine.

Document Tray

Insert the projections into the square holes on the top of the machine.

Document Return Tray

Hook the projections into the square holes on the rear of the machine.

Installing the Accessories

Handset

[Available as an option. (UF-744)]

Handset Cable

[Available as an option. (UF-744)]

Handset Cradle

[Available as an option for some countries. (UF-744)]

Hook the projections into the square holes on the left side of the machine.

Connect the cable into the HANDSET jack on the rear of the machine.

Note: For some countries, the handset may not be available because of the country's regulation or specification.

Installing the Toner Cartridge

Unpack the Toner Cartridge and rock it as shown for 5 or 6 times to even the toner inside.

Remove the green protective tab with seal.

Pull the release lever to open the printer cover.

Installing the Toner Cartridge

4

Align the arrow and the projections on both sides as shown and insert the toner cartridge into the machine.

5

- ① Remove the recording Paper Tray.
- ② Push back on the Lever (Black) and insert the Fuser Roller Cleaner with the carved letters "UP" facing upwards.

6

- ① Re-install the Recording Paper Tray.
- ② Close the printer cover firmly with both hands.

305000001 Loading the Recording Paper

305020001 Paper Specifications

In general, most bond papers will produce excellent results. Most photocopy papers will also work very well. There are many "name" and "generic" brands of paper available. We recommend that you test various papers until you obtain the results you are looking for. For detailed recommended paper specifications, see page 146.

305050001

305010001 How to Load the Recording Paper

1

Remove the recording paper cassette from the machine.

Caution: To prevent dropping the cassette, hold it by the front and side while pulling it out.

2

Adjust the Paper Width Guide.

3

Adjust the Paper Length Guide.

Loading the Recording Paper

4

Push the Pressure Plate until it is locked down.

5

① Load the paper into the paper cassette.

Caution: Make sure that the paper is set under the clips and does not exceed over the red line on the Paper width Guide. You can load about 250 sheets with standard weight paper (20 lb. or 75g/m²) (See page 146)

② Set the proper paper size label.

6

Re-install the paper cassette into the machine.

Note: Your machine will properly print on A4, Letter and Legal size paper only. If other size of paper (B4, B5, A5) is used, your machine may not print properly.

30600000

Connecting the Telephone Line Cord and Power Cord

■ Power Cord

Plug one end of the power cord into an ordinary AC outlet and the other end into the receptable on the rear of the machine.

306990002

Warning : This apparatus must be properly grounded through an ordinary AC outlet.

■ Telephone Line Cord

Plug one end of the telephone line cord into the telephone jack supplied by the telephone company and the other end into the LINE jack on the rear of the machine.

306990001

- Note:** 1. Your machine uses little power and you should keep it ON at all times. If the power is turned OFF for too long, the contents of the memory will be lost.
2. UF-788 has 2 separate rechargeable batteries to preserve the memory contents in case of a short term power failure. One for the machine parameters (such as LOGO, ID Number, Auto-dialer Telephone Number, etc.) which can back up for 10 days and the other one for the document memory, which can back up for 1 hour when fully charged.
- UF-744 has a rechargeable battery to preserve the machine parameters only for up to 10 days when fully charged.
3. The built-in rechargeable batteries require 48 hours to be fully charged in the machine.

306070006

306070008

306070009

Connecting the Telephone Line Cord and Power Cord

■ Power Switch

After connecting all cords,
turn the power switch ON.

Setting the Dialling Method (Tone or Pulse)

Your machine can operate with either of two dialling methods (Tone or Pulse), depending on the type of telephone line you are connected to. If you need to change the dialling method to Tone or Pulse, follow the procedure below.

007060001

SET MODE (1-6)

2:TONE

06 DIALLING METHOD
1:PULSE

or
06 DIALLING METHOD
2:TONE

007060004

007060005

008000001

Adjusting the Volume

You can adjust the monitor volume and ringer volume (UF-744 : Available only with the Fax Handset Option) on your machine. The built-in speaker enables you to hear the dial tone, dialing signals, and busy tone. The ringer sounds when your machine receives a call.

008030002

Setting the Monitor Volume

You can adjust the volume by using both **CLEAR** and **SET**.

The following describes the method of using **CLEAR** and **SET**.

1

You will hear the dial tone through the speaker.

2

repeatedly to raise the volume.

or

repeatedly to lower the volume.

3

008060003

Setting the Ringer Volume

[UF-744 : Available only with the Fax Handset option]

The ringer volume is located on the upper left of the handset cradle. Move the switch to a desired position, either high, low or off.

Note: 1. You can also adjust the volume of the key touch tone and the volume of the buzzer in Fax Parameter No. 10 (KEY/BUZZER VOLUME). (see page 35)
2. For some countries, the handset may not be available because of the country's regulation or specification.

009000011 User Parameters

Your facsimile machine has several basic settings (User Parameters) to help you keep records of the documents you send or receive. For example, the built-in clock keeps the current date and time, and your LOGO and ID Number help to identify you when you send or receive documents.

009030001 If a power failure occurs, a built-in battery will back up this information for up to 10 days when it is fully charged.

009020001 Setting the Date and Time

At standby the display will show the date and time. Once the standby display is set, it will automatically be updated.

One-Touch/Abbreviated Dialling Numbers

301020001 Entering One-Touch/Abbreviated Dialling Numbers

One-Touch and Abbreviated Dialling are two fast ways of dialling full telephone numbers. To use these dialling methods, you must first store the telephone number using the following procedure.

301050001

301990001

To enter a One-Touch key, follow these steps below

307060001

1

SET MODE (1-6)
ENTER NO. OR A V

301060001

2

1: ONE-TOUCH
2: ABBR. NO.

301060002

3

ONE-TOUCH< >
PRESS ONE-TOUCH KEY

301060003

4

Ex: 01

ONE-TOUCH<01> TEL.

5

Enter the telephone number.
(up to 36 digits including pauses and spaces)

Ex: 9 PAUSE 5 5 5 SPACE 1 2 3 4

ONE-TOUCH<01> TEL.
9-555 1234

301060004

6

ONE-TOUCH<01> NAME

301060005

7

Enter the station name using character keys
(up to 15 characters).

Ex: S A L E S SPACE D E P T .

ONE-TOUCH<01> NAME
SALES DEPT.

301060006

8

ONE-TOUCH< >
PRESS ONE-TOUCH KEY

301060007

To record another number, repeat step 4 to 8.
To return to standby, press STOP.

One-Touch/Abbreviated Dialling Numbers

To set an Abbreviated Dialling Number, follow these steps below

SET MODE (1-6)
ENTER NO. OR A V

1:ONE-TOUCH
2:ABBR. NO.

ABBR. []
ENTER ABBR. NO.

4 Ex: [2][2] (00 to 99)

ABBR. [22] TEL.
[]

5 Enter the telephone number.
(up to 36 digits including pauses and spaces)

Ex: [9][PAUSE][5][5][5][SPACE][2][3][4][5]

ABBR. [22] TEL.
9-555 2345

ABBR. [22] NAME
[]

7 Enter the station name using character keys
(up to 15 characters).

Ex: [A][C][C][O][U][N][T][I][N][G][SPACE]
[D][E][P][T]

ABBR. [22] NAME
ACCOUNTING DEPT

To record another number, repeat step 4 to 8.
To return to standby, press [STOP].

ABBR. []
ENTER ABBR. NO.

! Note: 1. If you require a special access number to get an outside line, enter it first and then press [PAUSE].
A hyphen "-" is displayed for pause.

2. Use [SPACE] to enter a space between the numbers to make it easier to read.

3. The built-in battery can back up One-Touch/ABBR. Numbers up to 10 days when a power failure occurs.

4. If you are using Pulse dialling and you wish to change to Tone dialling in the middle of dialling, press [TONE] (represented by a "T"). The dialling method will be changed from Pulse to Tone after dialling the digit "T".

Ex: 9 PAUSE TONE 5551234

5. You can search for unused One-Touch key or ABBR. number by pressing [^] or [v] in step 3 or 4.

01000001

One-Touch/Abbreviated Dialling Numbers

Changing or Erasing One-Touch/Abbreviated Dialling Numbers

If you have to change or erase any of the One-Touch/Abbreviated dialling numbers, follow the steps below.

To change the settings of a One-Touch/ABBR. dialling number

01060015

1: ONE-TOUCH
2: ABBR. NO.

2 Select 1 for One-Touch Dialling number
Select 2 for ABBR. Dialling Number

01060016

Ex:

ONE-TOUCH< >
PRESS ONE-TOUCH KEY

3 Enter the station you wish to change

01060017

Ex:

ONE-TOUCH<01> TEL.
9-555 1234

then enter a new telephone number.(see Note 1 and 2)

Ex:

ONE-TOUCH<01> TEL.
9-555 1234

01060018

01060019

ONE-TOUCH<01> TEL.
999 3456

then enter a new station name.(see Note 1 and 3)

Ex:

ONE-TOUCH<01> NAME
PANASONIC

ONE-TOUCH<01> NAME
PANAFAX

To return to standby, press .

ONE-TOUCH<01> NAME
PANAFAX

ONE-TOUCH< >
PRESS ONE-TOUCH KEY

1070009

1070006

1070007

1070008

- !** Note: 1. Use or to move the cursor, then enter the correct number over the incorrect number.
2. Use to insert a space between the numbers you set. If the telephone number is 36 digits in length, cannot be used to insert a space.
3. cannot be used to insert a space in setting of the station name.
4. If the One-Touch/Abbreviated dialling number has been used for a communication reservation, the settings cannot be changed or erased until the communication has finished.
To change or erase the settings, cancel the communication first by Edit File Mode (see page 76).

01000072

Customizing Your Machine

Your facsimile machine has a variety of adjustable Fax Parameters. These parameters, listed in the Parameter Table, are preset for you and do not need to be changed. If you do want to make a change, read the table carefully. Some parameters, such as the Resolution, Original, and Verification Stamp parameters, can be temporarily changed by simple key operations just before a transmission is made. When the transmission ends, however, these parameters return to their preset values (Home position). Other parameters can only be changed by the procedure described below.

002030001

Setting the Fax Parameters

007060001

SET MODE (1-6)
ENTER NO. OR ^ V

002000001

FAX PARAMETER (01-64)
NO. -1

3 Enter Fax Parameter number from the Parameter Table (see pages 35 to 37).

Ex: 01 for ORIGINAL

002060002

002060003

FAX PARAMETER (01-64)
NO. -01

01 ORIGINAL
1: NORMAL

5 Enter the new setting value.

Ex: 2 for LIGHT

002000004

01 ORIGINAL
2: LIGHT

02 RESOLUTION
1: STANDARD

To set another parameter, press **CLEAR** to return to step 3, or, to return to standby, press **STOP**.

002060005

002070001

002070002

002070003

! Note: 1. To scroll the Fax Parameters in Step 2 or 4, press **^** or **v**.

2. To print out a Fax Parameter List, see page 126.

3. The built-in battery when fully charged can back up the Fax Parameter settings for up to 10 days when a power failure occurs.

		2	Fine	
		3	S-Fine	
J02080004	STAMP	1	Off	Setting the home position of the STAMP key. To select the stamp function when document is stored in memory (see Fax Parameter No. 28).
		2	On	
J02080006	DIALING METHOD	1	Pulse	Selecting the dialling method.
		2	Tone	
J02080007	HEADER PRINT	1	Inside	Selecting the printing position of the header. Inside : Inside TX copy area. Outside : Outside TX copy area. No print : Header is not printed.
		2	Outside	
		3	No print	
J02080008	HEADER FORMAT	1	Logo, ID No.	Selecting the header format.
		2	From To	
J02080009	RCVD TIME PRINT	1	Invalid	Selecting whether or not the machine prints the received date & time, remote ID, percentage of reduction and page number on the bottom of each received page.
		2	Valid	
J02080010	KEY/BUZZER VOLUME	1	Off	Selecting the volume of the Key/Buzzer tone.
		2	Soft	
		3	Loud	
J02080011	COMM. JOURNAL	1	Off	Selecting the home position of printout mode for COMM. Journal Off/Always/Inc. only Off : No printout Always : Always prints out Inc. only : Printout when communication has failed.
		2	Always	
		3	Inc. only	
J02080012	AUTO JOURNAL	1	Invalid	Selecting whether or not the machine prints the journal automatically after every 32 transaction.
		2	Valid	
J02080013	FILE ACCEPTANCE JOURNAL	1	Invalid	Selecting whether or not the machine prints the file acceptance journal. If you set this parameter to valid, the journal will be printed out after entering any communications using memory.
		2	Valid	

J02990001 Continued on the next page.

Customizing Your Machine

No.	Parameter	Setting Number	Setting	Comments
22	SUBSTITUTE RCV	1	Invalid	Selecting whether or not the machine receives to memory when recording paper runs out, toner runs out or recording paper jammed.
		2	Valid	
24	PRINT REDUCTION	1	Fixed	Selecting print reduction mode. Fixed: Reduce document according to setting of Parameter No. 25. Auto: Reduce document according to the length of received documents.
		2	Auto	
25	REDUCTION RATIO	70	70%	Selecting fixed print reduction ratio from 70% to 100%. This parameter functions only when fixed print reduction is selected on fax parameter no. 24.
		—	—	
		100	100%	
26	POLLING PASSWORD	—	(—)	Setting a 4-digit password for secured polling.
27	POLLED FILE SAVE	1	Invalid	Selecting whether or not the machine retains the polled document in memory even after the document is polled once.
		2	Valid	
28	STAMP AT MEM. XMT	1	Invalid	Selecting whether or not the machine stamps the original documents when storing the documents into memory.
		2	Valid	
30	DRD SERVICE	1	Invalid	Selecting whether or not the machine is available "DRD Service". If this parameter is set to "Valid", your machine detects the specified ring pattern only to receive a document automatically. (For Hong Kong and Australia model only)
		2	Valid	
31	INCOMPLETE FILE SAVE	1	Invalid	Selecting whether or not the machine retains the document in memory if the document is not successfully transmitted.
		2	Valid	
32	COPY REDUCTION	1	Invalid	Selecting whether or not the machine performs copy reduction in accordance with the setting of Parameter No. 24 and 25.
		2	Valid	
33	XMT REDUCTION	1	Invalid	Selecting whether or not the machine performs reduction when the transmitting document is wider than the recording paper used at the receiving machine.
		2	Valid	
34	POWER SAVE TIMER	—	Start-Time	To reduce the power consumption of the machine in standby, select the time period to turn off the high temperature fuser unit when the printer is idle. Up to 30 seconds delay will be required to warm up again before the next printing starts.
		—	End-Time	
37	RCV TO MEMORY		(—)	Enter a 4-digit password used to print out the received document in memory by F8-5 (RCV TO MEMORY). When F8-5 is set to On, this parameter will not be shown on the LCD display. (see page 83)
38	FAX ACCESS CODE		(—)	Enter a 4-digit Fax Access Code to secure the machine from unauthorized use. (see page 82)
41	RELAY XMT REQUEST	1	Invalid	Selecting whether or not the machine performs Relay XMT Request. (see page 107)
		2	Valid	

Continued on the next page.

00100000 Loading Documents

001020003 How to Load Documents

1. Be sure the document(s) is free of staples, paper clips and is not torn, greasy or covered by foreign objects.
2. Place the document(s) **FACE DOWN** on the Automatic Document Feeder (ADF) until the leading edge placed into the machine stops.
If you are sending multiple pages, make sure that the **bottom sheet enters first**. You can also stack up to **50 PAGES** (see Note 1 and 2) on the ADF at one time. If you have more than 50 pages, wait until transmission or storing in memory starts as pages feed through, place any remaining pages on top of the last page in the feeder.
3. Adjust the Document Guides to center the document on the ADF.

001090001

CORRECT

INCORRECT

When you set a document on the ADF, the display message will change from date and time (standby) to **DOCUMENT SET**. You can now change basic transmission settings, or begin the dialling procedure.

ENTER STATION(S) 00%

001070008

- !** Note: 1. The ADF capacity of UF-744 is up to 30 pages.
2. The document limitation to send multiple pages is as follows.

	Document Size	Document Thickness
Up to 30 pages	297 mm x 419 mm (A3 size)	0.06 mm (45 g/m ²) to 0.12 mm (75 g/m ²)
Up to 50 pages	A4 size	0.12 mm (75 g/m ²)

001070001

001070006

001070003

3. Transmitting documents longer than 356 mm requires user's assistance.
4. When transmitting documents longer than A4 size, please extend the sub-tray as shown below.

Basic Transmission Settings

You can temporarily change the transmission settings either before or after you place document on the ADF. These settings are as follows;

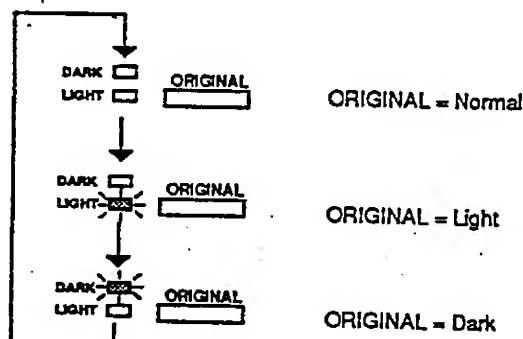

- Original (Contrast)
- Resolution
- Halftone
- Stamp
- Communication Journal

002030001 After your document has been sent, your machine will automatically return to the preset settings.

002020001 Original (Contrast)

Your machine is preset to Normal contrast. If you have to send a document with light print contrast, you may get better results by changing the setting to Light. If you have to send a document with dark print contrast, change the setting to Dark.

002050001 Press **ORIGINAL** to:

Note: To change the preset Contrast position, change the setting of Fax Parameter No. 01, see page 35.

002020002 Resolution

Your machine is preset to Standard resolution, which is suitable for most documents. Use Fine or Super Fine for detailed documents.

Press **RESOLUTION** to:

Note: To change the preset Resolution position, change the setting of Fax Parameter No. 02, see page 35.

Basic Transmission Settings

Halftone

The Halftone setting is useful when sending photographs or illustrations with gray tones. Your machine is preset to HALFTONE = Off. You can select either Fast mode or Quality mode.

Note: When you select HALFTONE, FAST or QUALITY, your machine will automatically select Fine Resolution.

Verification Stamp

The Verification Stamp helps you to confirm successful transmissions by stamping the bottom of each successfully transmitted page with a small ⊗ mark.

Press **[STAMP]** to:

Note: 1. When you store document in memory, the Verification Stamp will not function. If you wish to enable the use of the Verification Stamp when storing document in memory, change the setting of Fax Parameter No. 28, see page 36.

2. To change the preset Verification Stamp position, change the setting of Fax Parameter No. 04, see page 35.

Basic Transmission Settings

302020005 Communication Journal (COMM. JOURNAL)

A Communication Journal lets you verify if the transmission was successful. You can select the condition to print out the communication Journal as follows.

When you set COMM. JOURNAL = OFF,

When you set COMM. JOURNAL = ON,

When you set COMM. JOURNAL = INC.,

a Communication Journal will not be printed out.

a Communication Journal is printed out automatically after every communication.

a Communication Journal is printed out automatically only if the communication has failed.

02070006

30300000 Sending Documents

You can choose either Memory or Direct Transmission.

Use Memory Transmission if:

- You want to send the same document to multiple stations.
- You have to retrieve the document immediately.

Use Direct Transmission if:

- The memory is full.
- You want to send the document after talking with the other party.

303030001

303010001 Memory Transmission

Your machine quickly stores the document into the machine's memory.

Then, starts to dial the telephone number.

303040001

If the transmission fails, your machine will re-transmit the remaining unsuccessful page(s) automatically.

Note: 1. The File Number of the document being stored is shown at the upper right corner of the display while storing the document. It is also printed on the Communication Journal (COMM. JOURNAL), 32 Transaction Journal and File List. The percentage of memory used is shown on the lower right corner of the display after each page is stored.

2. If a memory overflow occurs while storing documents into memory, the machine will prompt on the display, whether to start transmitting those pages which are successfully stored or to cancel the transmission. Press **[1]** to cancel; press **[2]** to transmit. See Specifications, page 144 for the image memory capacity. If no action is taken within 5 seconds, the machine will start transmitting the stored pages.

3. An Information Code will be displayed if the transmission has failed or no answer at the receiving side after the last automatic redial. The document stored for this transmission will be erased from the memory automatically and the transmission is marked "INC" (incomplete) on the Communication Journal (COMM. JOURNAL).

If you need to retain the incomplete documents even after the last redial, change Fax Parameter No. 31 (INC. FILE SAVE) to Valid in advance. (see page 36)

To retry the incomplete documents, refer to page 81.

4. When a power failure occurs,

[UF-788]

The document information stored in memory will be saved for up to 1 hour, when the battery is fully charged.

[UF-744]

The document information stored in memory will be lost. A Power Failure Report will be printed automatically after the power is restored.

The report will not be printed if there were no documents in the memory. (see page 127)

To receive documents manually

1

When the telephone rings, lift the handset. If you hear a beep, the sound tells you that someone wants to send a document.

2

Remove any documents from the ADF.

3

Your machine starts receiving the document.

4

Hang up the telephone.

ON LINE * RCV *

30400000 Receiving Documents

304010008 Print Reduction

This machine can use Letter, Legal or A4 size plain paper for recording. Sometimes, oversized documents sent to you by the other parties cannot be printed within a single page. When this occurs, the document will be divided into separate pages.

304040008 This machine is equipped with a Print Reduction function to solve this problem. You may select the most appropriate setting from the selections described below.

1. Automatic Reduction

304900002 Each page of a received document is first stored in memory. Based on the document length, your machine will automatically calculate the suitable reduction ratio (70% to 100%) to print the entire document on a single page. If the received document is extremely long (over 39% longer than the recording paper), the document will be divided into separate pages and printed with no reduction.

2. Fixed Reduction

304990003 You can predetermine the reduction ratio from 70% to 100% in 1% steps. The document(s) you received will be reduced to this ratio regardless of the size.

304020010 Selecting the Print Reduction Mode

Set Fax Parameters as shown below. (see page 36)

1. To set Automatic Reduction mode.

(1) No. 24 Print Reduction set to "Auto".

2. To set Fixed Reduction mode.

(1) No. 24 Print Reduction set to "Fixed".

(2) No. 25 Reduction Ratio set to any number between 70% through 100%. (see Note)

Ex: A4 to A4 – 96%

A4 to Letter – 90%

Letter to Letter – 96%

Legal to Letter – 75%

304070008 **Note:** If sending side is set to print the header on outside of the copy area, more reduction ratio will be required.

Receiving Documents

304020011 Receiving Oversize Documents

If received document is extremely long (over 39% longer than the recording paper), the document will be divided into separate pages. When printing on separate pages, the bottom 10mm of first page will be overlapped on top of the next page.

304050002

304090001

Transmitted Document

Received Document

The receiving document is divided into two sheets with overlap printing.

Note: If the reduction method is set to Automatic Reduction mode, the document is printed out with no reduction when printing out separate pages. If the reduction method is set to Fixed Reduction mode, the document is printed out by the ratio you set in Fax Parameter No. 25.

304070009

X040000 Receiving Documents

X04010009 Substitute Memory Reception

If the recording paper runs out or jams or if the toner runs out during reception, the machine automatically starts receiving document into its image data memory. Stored documents are printed automatically after replacing the recording paper or toner cartridge.

- 1** When the machine finishes the memory reception and there is no recording paper or toner, an Information Code appears on the display.

NO RECORDING PAPER
INFO. CODE-010

OUT OF TONER
INFO. CODE-041

- 2** Install recording paper (see page 18) or replace the toner cartridge (see page 16).

The machine will automatically start printing the document stored in the memory.

* PRINTING *
MEMORY RCV'D DOC

Note: 1. If the memory overflows, the machine will stop receiving and release the communication line. The document(s) stored in the memory up to that moment will be printed out automatically.

2. When a power failure occurs,
[UF-744]

The document information stored in memory will be saved for up to 1 hour, when the battery is fully charged.
[UF-788]

The document information stored in memory will be lost. A Power Failure Report will be printed automatically after the power is restored.

The report will not be printed if there were no documents in the memory. (see page 127)

3. If you wish to turn off the substitute reception function, change the setting of Fax Parameter No. 22 to "Invalid" (see page 36).

305000001

4 Enter a 4-digit polling password.

Ex: 1 2 3 4

26 POLLING PASSWORD
1234

002060002

007060005

Note: 1. Polling might not function with all fax machines. We suggest you attempt a trial polling before you actually poll important documents.

2. If a password is not set in the polled station, you may poll the other station even though your machine has a password.

002070001

002070002

Polling

Preparing to be Polled

In order to let other stations poll your machine, you must prepare your machine with a document stored in memory. Be sure to set the polling password before storing the document into memory. After being polled, the documents stored in the memory will be erased automatically.

Fax Access Code

The Fax Access Code prevents an unauthorized user from operating the machine. Once a 4-digit Fax Access Code is registered, no one can operate the machine without entering the correct access code. Automatic Receiving, however, is always available. After you complete any operation, such as mode setting or transmission, and the display returns to standby, you have to reenter the access code in order to use the machine again. Registering the Fax Access Code does not affect the use of the machine in any other way.

10060007

Your machine will print the file. The document(s) will remain in the memory even after printing the file.

Distinctive Ring Detector (DRD)

This function is only effective for companies in countries which offer the DRD Service.

Your machine has a special feature in conjunction with an optional service provided by many local telephone companies. It can distinguish up to 2 telephone numbers with a corresponding ring pattern identifying each number. "DRD" lets you provide multiple phone numbers, one for your fax, business or personal use with only one single phone line.

Please check with your local telephone company on the availability of this service in your area.

Your machine can be programmed to respond to the specified ring pattern only for the DRD Service. To enable your machine to detect the ring pattern only for fax communication, change the setting of Fax Parameter No. 30 (see page 36).

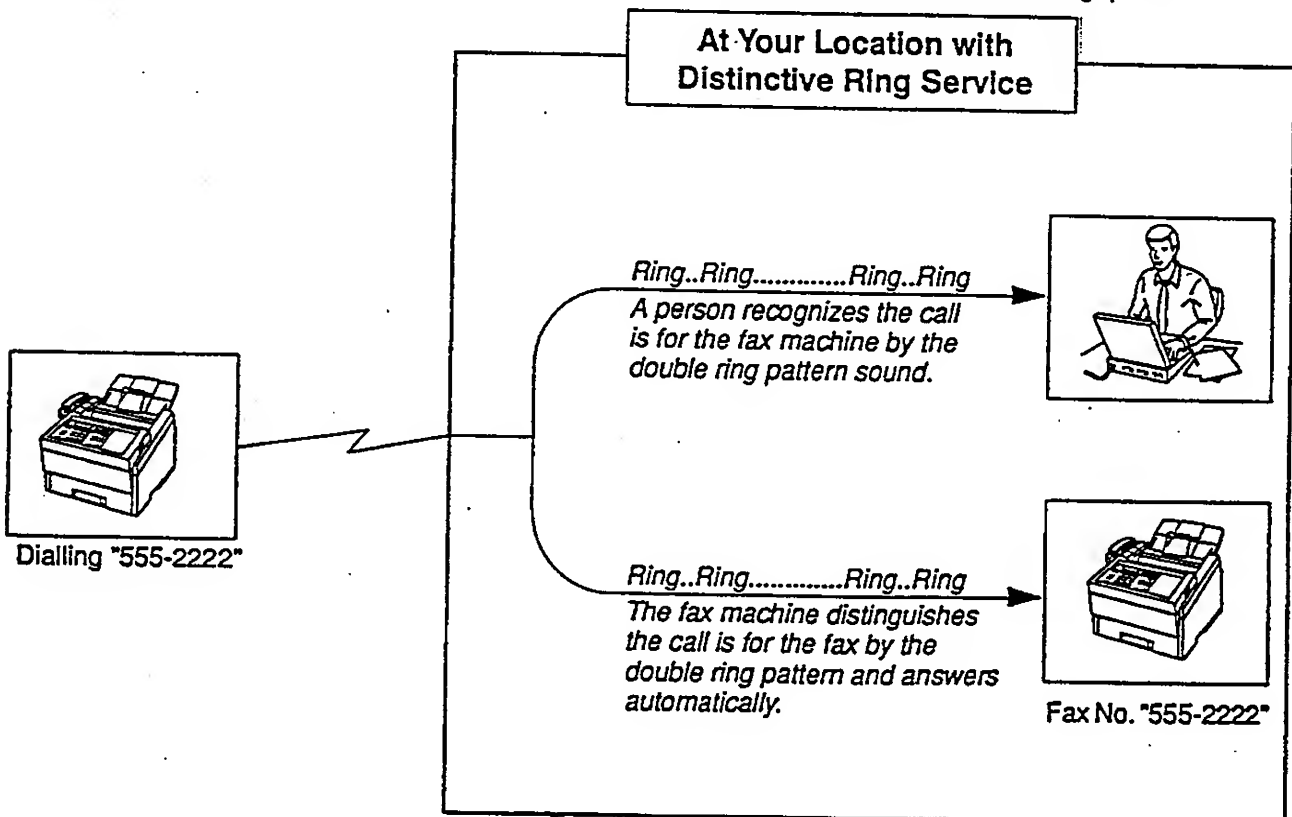

The following table shows a typical example with 2 telephone numbers on a single phone line.

Telephone No.	Usage	Distinctive Ring Sound (see Note 2)	Ring Pattern
555-1111	Phone	<i>Ring.....Ring.....</i>	Standard Ring
555-2222	Fax	<i>Ring..Ring.....Ring..Ring.....</i>	Double Ring

Note: 1. "Ring" means a long ringing sound and "Ring" means a short ringing sound.
2. The distinctive ring sound is differ depending on the specification for each DRD service.

The following illustration shows a typical set up, with your machine set to detect "double ring" pattern.

301000001

Selective Reception

Your machine has a special feature, Selective Reception, which can prevent the receiving of unnecessary documents (i.e. junk fax, direct mail, etc.).

Before receiving the document, the last 4 digits of the ID Number received from the sending machine will be compared with the last 4 digits of the telephone number programmed in each One-Touch or Abbreviated station. When a match is found, your machine will start receiving the document. If a match is not found, your machine will cancel the reception and an Information Code 406 will be recorded on the Journal.

Note: 1. When the Selective Reception is set, your machine can receive only from those stations which are programmed in the built-in auto-dialer.
2. If your ID number has not been set, your machine might not be able to receive from some models. To set your ID number, see page 27.

301070001

301070004

00200000 Password Communications

002020001 General Description

Password Communications, including Password Transmission and Password Reception will prevent your machine from sending a fax to a wrong station or receiving a fax from unauthorized stations. You can set Password Transmission and Password Reception independently, or both together.

To use Password Transmission, you must set a 4-digit transmission password in advance. The password must be shared with other compatible Panafax machine(s). If the transmission password in your machine does not match the transmission password in the other compatible Panafax machine(s), the transmission will fail. You can select password transmission by setting Function 8-4, PASSWORD-XMT to ON when you send a document.

To use Password Reception, you must set a 4-digit receiving password in advance. The password must be shared with the other compatible Panafax machine(s). If the password in your machine does not match the receiving password in the other compatible Panafax machine(s), the reception will fail. Once you set password reception and set the parameter to ON, it stays until you change the setting to OFF.

002020006 Compatibility with Other Machines

You can only use password transmission and reception with another Panafax compatible machine(s) listed below.

Dial by any combination of the following methods.

- Manual Number Dialling
(UF-788 : Up to 32 stations / UF-744 : Up to 12 stations)
- One-Touch Dialling
- Abbreviated Dialling
- Directory Search Dialling
(For details, see page 45 to 48.)

Ex: 01

(When entering a station for Manual Number Dialling or Directory Search Dialling, press **SET** after each station is entered.)

ONE-TOUCH
<01> (Station name)

X02060014

7

If your machine's Transmission Password coincides with the other station's Transmission Password, your machine starts sending the document.

When transmission is completed, PASSWORD-XMT returns to standard setting (OFF or ON).

X02060012

X02020005 Using Password Reception

There is no additional operation required once you set the parameter following the procedure on the previous page. The parameter, -OFF or ON, cannot be selected for each reception. It is always OFF or ON until you change the setting.

X02050004

03000001 Confidential Mailbox and Confidential Network Communications

03030001 Your machine is equipped with two Confidential Communication features which ensure that the Confidential information you send is received by only the person with the correct confidential code.

03010001 Confidential Mailbox

03040001 The confidential mailbox feature can be used as a mailbox to communicate with other compatible models using a 4-digit confidential code. The Confidential Mailbox feature receives document(s) with a confidential code into memory. These documents can only be printed by the person who has the correct confidential code.

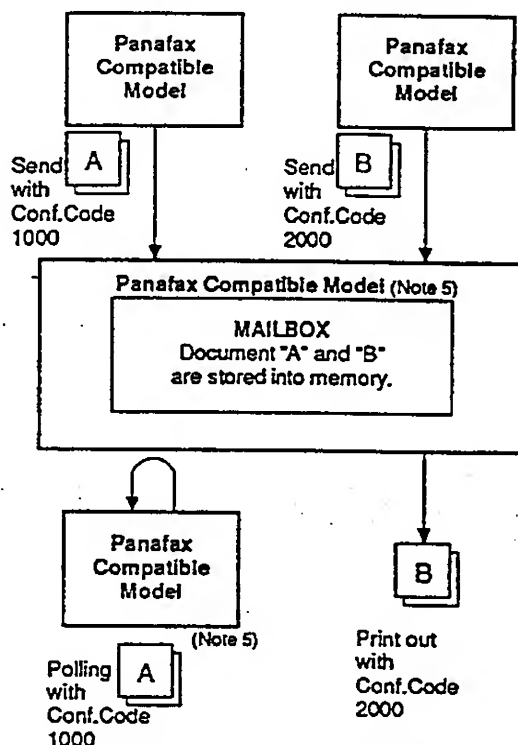

Figure 1: Confidential Mailbox

03090001 01 Compatibility with Other Machines

03050001 Table 1 shows a list of compatible Panafax model which has the Confidential Mailbox feature. It also shows whether or not special settings are required.

Table 1: Confidential Mailbox Requirement

Compatible Model	Special Settings
UF-280M UF-733 UF-755 UF-312 UF-744 UF-766 UF-322 UF-745 UF-788	Not Required.

- !** Note: 1. If your machine receives two confidential faxes with same confidential code, both documents are stored together in the same confidential mailbox.
2. Up to 10 Mailbox files can be stored in memory. So, you can receive the confidential fax using 10 different confidential codes.
3. If the memory overflows, the machine will stop receiving and release the line.
4. We recommend that optional memory be installed when this function is used. See page 144 on Image Memory Capacity.
5. If a confidential faxes was received in the mailbox of UF-733, you cannot poll those document. The UF-733 is designed to print out the received confidential document locally only.

Confidential Mailbox and Confidential Network Communications

Confidential Network Communications (Via a Center Station)

The Confidential Network Communication requires a Center Station such as a UF-650 to communicate with other Panafax models which have confidential communication features. First the Initial Sending Station sends a confidential document to the Center Station together with a Confidential Code. The document will remain in the center station's memory until polled by End Receiving Station. In the example given in figure 2, the End Receiving Station must know the Confidential code attached to the document.

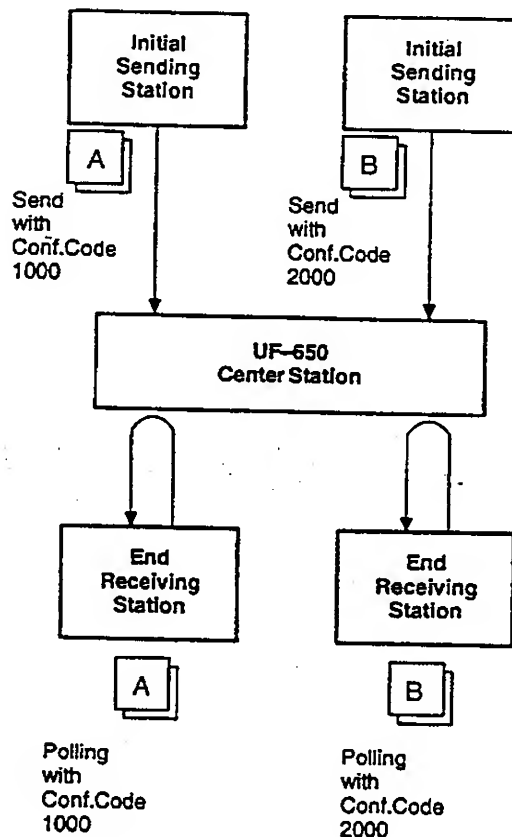

Figure 2: Sending Confidential Faxes via Center Station

If a UF-650 or UF-620 is the Center Station, more than one document can be stored in the same memory file using the same Confidential Code. That is, you can keep adding faxes to the file, just like putting mail in a mailbox, until the memory is full. If a UF-640 is the Center Station, you cannot add a fax to the file which has the same Confidential Code attached with a file already stored in the memory. Whichever station you use, you can create more than one file, each with a different Confidential Code.

The stored confidential document will be available to be polled by the end receiving station.

Once you have polled or printed the confidential document from the Center Station, the document is automatically erased from the Center Station's memory.

030000 Confidential Mailbox and Confidential Network Communications

03020008 Compatibility with Other Machines

Table 1 shows how your machine fits in with the compatibility requirements of the different kinds of facsimile stations which make up a Network for Confidential Communications. It also shows whether or not special settings are required.

03050007

Table 1: Confidential Communication Requirement

03020009 Setting Up Your Machine for Confidential Network Communications

03050008

To use Confidential Communications, you must first preset the Confidential Communication Fax Parameter described below. Then, every time you actually send a Confidential Fax you must set a Confidential Code.

1. Confidential Communication Fax Parameter

This switches the Confidential Communications function to Invalid/Valid.

2. Own Telephone Number

The full telephone number should be entered.

3. Network Password and Polling Password

You may use Network Password and Polling Password to prevent outside facsimile(s) from using the Confidential Communication network. The same password must be provided to all the machines inside the network.

4. Confidential Code

A 4-digit code must be assigned to each Confidential Fax you send. It identifies the fax when it is stored in the Relay Station. The receiving person must know the code in order to poll the fax from the Relay Station.

Relayed Transmission

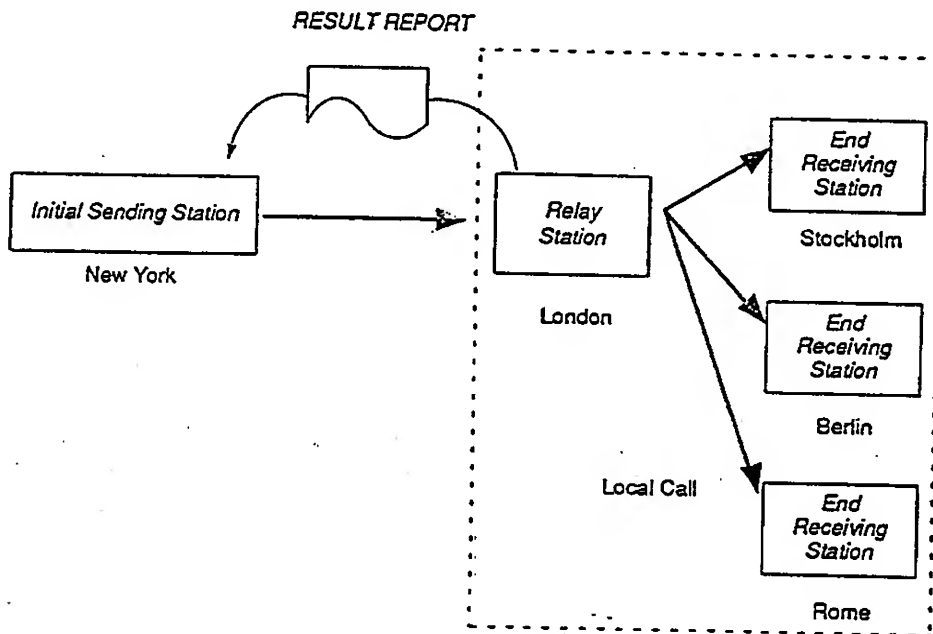

General Description

Relayed Transmission is a feature which can save you time and transmission costs if you need to send the same document to several facsimile stations at the same time. This is especially true if the transmissions are long distance.

To use Relayed Transmission, you must be part of a "Relay Network" built around a "Relay Station". That is, when you send a document by Relayed Transmission, you actually send it to a Relay Station together with instructions to relay it to one or more end receiving station(s).

The Relay Station first receives the document in its memory and then relays it to the end receiving station(s).

Example:

! Note: The number of end receiving stations that can be reached by a Relayed Transmission is limited by the memory capacity of the initial sending machine; i.e., your machine cannot make a Relayed Transmission to more than 139 end receiving stations. This is enough, however, to allow more than one Relay Network to be set up.

Compatibility with Other Machines

Table 1 shows the kind of facsimile machines which can make up a Relay Network used for Relayed Transmission. Note that your machine can serve as an Initial Sending Station or End Receiving Station.

Table 1: Relay Network Compatibility Requirements

Station	Compatible Model	Special Settings
Initial Sending Station	UF-150 UF-300 UF-750 UF-160 UF-312 UF-750D UF-160M UF-322 UF-755 UF-170 UF-620 UF-766 UF-250 UF-640 UF-788 UF-260 UF-650 UF-270 UF-733 UF-270M UF-744 UF-280M UF-745	Required. Please refer to the individual User's Guides of each machine.
Relay Station	UF-620 UF-650 UF-640 UF-M500	
End Receiving Station	ITU-T/CCITT G3/G2 Compatible machines	Not required.

Relayed Transmission

20003 Relay Network

A Relay Network is basically a group of facsimiles programmed to communicate with each other via a Relay Station. In this case, the word programmed means that certain numbers have been stored in the memory of each machine. These numbers, also called parameters, are needed to identify the machines in the network.

Since your machine can only serve as an Initial Sending Station or End Receiving Station in a Relay Network, it is assumed that you will not have to establish the network yourself. All you have to do is follow the set up procedure described here, and certain instructions provided by the network organizer (usually the person controlling the Relay Station). You should know, however, what kind of network you are going to connect to, and how it works. A sample network is shown in figure 1.

Figure 1 shows a sample network as seen from New York. London and Singapore are Relay Stations connected to New York. Viewed from New York, Stockholm, Berlin, Rome, Tokyo, Hong Kong, Wellington and Sydney are End Receiving Stations.

With this simple network using two Relay Stations, you can send a document with one operation to any combination of stations in the network via the London Relay Station and/or Singapore Relay Station. If New York only transmits to one station, for example, then the document will go directly to the station or indirectly via the Relay Station depending on the One Station XMT Parameter you preset.

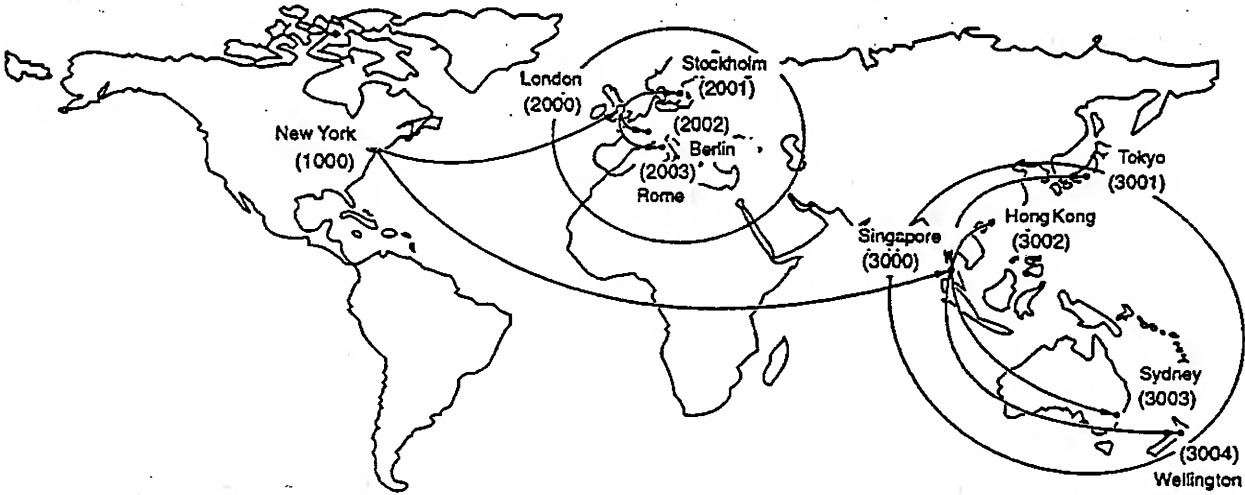

Figure 1: Sample Network

Relayed Transmission

Table 2, 3 and 4 are sample settings for a Sample Network.

Relayed Transmission

Setting Up Your Machine for Relayed Transmission

To set up your machine for Relayed Transmission, use the procedures on the following pages to set the parameters listed below. Some parameters (e.g., Relayed XMT FAX Parameter) are only set once, but others must be set separately for each station in the Relay Network.

1. Relayed XMT Request FAX Parameter

This switches the Relayed XMT Request function to Valid or Invalid.

2. Own Telephone Number

The full telephone number to which the machine is connected should be entered for Relay Station send back Result Report.

3. Own Network Address

A 4-digit Own Network Address should be entered for Relay Station send back Result Report.

4. Network Password

A 4-digit number which prevents unauthorized (outside) stations from accessing the Relay Station and using its memory. Every Relay requesting and Relay stations in the network should set the same Network Password.

5. One-Touch/ABBR Numbers

The One-Touch or ABBR number you set must represent the fax number of a particular station in the network as seen from your station.

1) Network Address

End Receiving Station telephone numbers set in an Initial Sending Station may be different from the numbers set in a Relay Station. To send a fax to an End Receiving Station via a Relay Station each station in the network must be identified with a certain code which does not vary depending on where you call from. The code is the Network Address, which consists of a 4-digit number and is assigned to a One-Touch/ABBR number.

2) Relay Address

A 2-digit number which identifies the Relay Station your machine will use. Your machine may be connected to more than one Relay Station in parallel, but when you use Relayed XMT Request your machine will only send documents to the Relay Station identified by the Relay Address.

3) Relay Station Parameter (Yes/No)

Set "Yes" if the particular station you are recording is a Relay Station. If you are connected to more than one Relay Station in series, set "Yes" only for the first Relay Station.

4) One Station XMT (Relay/Direct) Parameter

If you send a document to only one End Receiving Station, you can set your machine to transmit directly to that station, without going through the Relay Station, by selecting "No". Set "Yes" if you always want to go through the Relay Station.

Relayed Transmission

4 Enter your 4-digit Network Address.

Ex: and press

NETWORK PASSWORD
■■■■

5 Enter your 4-digit Network Password.

Ex: and press

OWN TELEPHONE NO.
1 212 111 1234

6 

To set a One-Touch/ABBR. Dialling Number, Network Address, Relay Station Parameter (Yes/No) and One Station XMT (Relay/Direct) Parameter;

1  

SET MODE (1-6)
ENTER NO. OR ^ V

2  

1:ONE-TOUCH
2:ABBR. NO.

3 

ONE-TOUCH< >
PRESS ONE-TOUCH KEY

4 Ex:

ONE-TOUCH<01> TEL.
■

Continued on the next page.

Relayed Transmission

5

Enter the telephone number.

Ex:
 and press

ONE-TOUCH<01> NAME

6

Enter the station name.

Ex: and press

ONE-TOUCH<01>
NETWORK ADDRESS=||||

7

Enter a 4-digit Network Address.

Ex: and press

ONE-TOUCH<01>
RELAY ADDRESS=||

8

Enter a 2-digit Relay Address.

Ex: and press

ONE-TOUCH<01> NO.=2
RELAY STN? 1:Y 2:N

9

If the recorded station is the Relay Station, press .
If not, press .

Ex:

10

In case the station you have just recorded will be used for one-station transmission, you can preset the transmission route.

- 1: For transmission via the Relay Station
- 2: For direct transmission

Ex:

Repeat step 4 through 10 to enter the numbers for other stations, or return to standby by pressing .

Print out a list of One-Touch/ABBR number or Directory Search List to confirm that you have recorded everything correctly. For the printout operation, refer to page 122.

Relayed Transmission

Sending a Document by Relayed Transmission

Once you have recorded all the necessary parameters in your machine in accordance with the Relay Network you belong to, you can send a document to two or more stations in the network system, automatically, using the procedure below.

1

Set document(s) face down.

DOCUMENT SET
ENTER STATION(S) 00%

2

RELAYED XMT
ENTER STATION(S)

3

Dial by any combination of these.

- One-Touch Dialling
- Abbreviated Dialling
- Directory Search Dialling

Ex: 01 and ABBR 2 7

(When entering a station for Directory Search Dialling, press SET after each station is entered.)

ONE-TOUCH
<01> (Station name)

ABBR. STNS=002
[27] (Station name)

4

The document is stored into memory and your machine starts to dial the number of the Relay Station and sends the document.

After the Relay Station finishes its transmission to the End Receiving Stations, your machine prints out a RELAY XMT RESULT REPORT sent back by the Relay Station.

* STORE * NO.001
PAGES=01 01%

Note: You cannot use manual number dialling in step 3.

00001

Relayed Transmission

20006 Printouts and Reports

50006 When you use Relayed Transmission, your machine will print the following two reports to help you check and keep track of your faxes.

1. Relay XMT Report (COMM. JOURNAL)

When your machine finishes transmitting to the Relay Station, it will print a COMM. Journal when the Fax Parameter No. 12 is set to "2", this tells you whether the transmission was successful or not.

2. Result Report

30003 When the Relay Station finishes transmitting your fax document to the End Receiving Station(s) in your network, it will print a RELAY XMT RESULT REPORT, it tells you what it did and whether it was successful or not.

003 **Note:** If you transmit via more than one Relay Station, you will receive a separate Result Report.

- (7) The time when the Relay Station ends sending Relay Faxes
- (8) Initial Sending Station's information (LOGO, Telephone number and Network Address)
- (9) Communication number
- (10) Communication result : "OK" indicates that the transmission was successful.
"R-OK" indicates that the transmission to the Relay Station was successful.
"INC" indicates that the transmission was not completed.
- (11) Station name
- (12) Number of pages transmitted/number of pages received Relay Request
- (13) Another Relay Station's Relay Address/Network Address (If transferred to another Relay Station)
- (14) Relay Station's information (LOGO, Telephone number and Network Address)

Journals and Lists

To help you maintain records of the documents you sent and received, as well as lists of the numbers you record, your facsimile machine is equipped to print the following journals and lists: 32 Transaction Journal, Individual Transmission Journal, Communication Journal, One-Touch/ABBR. No. List, Program List, Fax Parameter List, Power Failure Report and File List.

32 Transaction Journal

The "Journal" is a record of the last 32 transactions (a transaction is recorded each time you send or receive a document). It is printed out automatically after every 32 transaction, but you can print it manually using the following procedure:

PRINT OUT (1-7)
ENTER NO. OR ^ V

1: JOURNAL?
PRESS SET TO PRINT

* PRINTING *
JOURNAL

! Note: If you wish to disable the automatic print out of the 32 Transaction Journal, change the setting of Fax Parameter No. 13 to "Invalid". (See page 35)

Individual Transmission Journal (IND. XMT JOURNAL)

An Individual Transmission Journal contains information on the latest transmission.

PRINT OUT (1-7)
ENTER NO. OR ^ V

Our Ref. 350/PJC/EAC

18th January, 1972.

Dr. P.N. Cundall,
Mining Surveys Ltd

...variations of print density ...
cause the photocell to generate an analogous electrical video signal.
This signal is used to modulate a carrier, which is transmitted to a
remote destination over a radio or cable communications link.

At the remote terminal, demodulation reconstructs the video
signal, which is used to modulate the density of print produced by a
printing device. This device is scanning in a raster scan synchronised
with that at the transmitting terminal. As a result, a facsimile
copy of the subject document is produced.

Probably you have uses for this facility in your organisation.

Yours sincerely,

Phil.

P.J. CROSS
Group Leader - Facsimile Research

20008 Power Failure Report

The UF-788 has a built-in rechargeable battery installed to retain the document information for up to 1 hour when a power failure occurs.

50008

However, if the battery system has problems, the document information might be lost. In this case, a Power Failure Report will be printed automatically for each file separately, after the Power is turned ON again. This report is not printed if there were no files in the memory.

(4) File number

: 001 to 255.

(5) One-Touch number, ABBR. number and network address if entered

: <nn> = One-Touch number, [nn] = Abbreviated number

(6) Station name in the One-Touch/ABBR. key or telephone number

(7) Number of pages stored

: The first three-digit number represents the number of pages successfully transmitted. The second three-digit number represents the number of pages stored into memory.

(8) Program key

: P1 to P8

(9) Program name

(10) Relay station

: If this file is stored for relayed transmission, the ABBR. number and network address of relay station is printed in the column.

(11) Own LOGO

: Up to 25 characters

(12) Own ID number

: Up to 20 digits

017

(13) Own Character ID

: Up to 16 characters

Troubleshooting

If You Have Any of These Problems

Mode	Symptom	Action	page
During Installation	The display is blinking	Battery discharged completely. This may happen at first installation. After setting the clock, the blinking will stop.	24
During Transmission	Document doesn't feed/multiple feed	1. Check that your document is free of staples and paper clips, and that it is not greasy or torn. 2. Check that your document is the right type to send through a fax machine by consulting the list on "Documents You Cannot Send". If your document has the characteristics listed, make a photocopy of your document and send the copy instead. 3. Check that the document is loaded properly. 4. Adjust the ADF Pressure Plate.	39 40 137
	Document jam	The information code 031 will appear on the display if the document becomes jammed.	134
	Does not stamp	1. Check if Stamp LED is lit. 2. Check Fax parameter No. 04 and No. 28 settings.	42 35,36
	Stamp too light	Replace stamp or refill ink.	140
Transmission Copy Quality	Vertical lines on the transmitted document	Check own copy quality. If copy is OK, your machine has no problem, report to receiving party that they have a problem. If copy is NG, clean the Document Scanning Area.	135
	Transmitted document is blank	1. Make sure the document is set face down. 2. Check own copy quality. If copy is OK, your machine has no problem, report to receiving party that they have a problem. If copy is NG, clean the Document Scanning Area.	--
During Reception	No recording paper	The information code 010 will appear on the display if the paper runs out.	18
	Recording paper jam	The information code 001, 002 or 003 will appear on the display if the paper gets jammed.	133
	Recording paper doesn't advance into machine	Make sure that there is paper in the Paper Cassette. Follow instructions for loading paper.	18
	Recording paper doesn't eject after printing	Check to see if the recording paper is jammed inside of the machine.	133
	Document auto reduction doesn't work	Check Print Reduction settings.	60
	Out of toner	The information code 041 will appear on the display if the Toner Cartridge runs out of toner.	16

Troubleshooting

Mode	Symptom	Action	page
Print Copy Quality	Vertical lines printing on the received document	Printout a Journal report (e.g. FUNCTION, 6, 1 and SET) and check quality to make sure if your machine has trouble or not. If Journal report quality is OK, your machine has no problem, report to sending party that they have a problem. If copy is NG, replace the Toner Cartridge.	117 16
	Fuzzy print	1. Make sure you are using the correct paper for the best possible print quality. 2. Try reversing the recording paper to the other side.	146
	Missing dots or lines/inconsistent darkness within print	1. Make sure you are using the correct paper for the best possible print quality. 2. Replace the Toner Cartridge.	146 16
Print Copy Quality	Fading print	The Toner Cartridge may be running out of toner. Replace the Toner Cartridge.	16
	Faint print	You may need to choose a different paper for the best possible print quality.	146
Communication	No dial tone	1. Check the connection of telephone line. 2. Check the telephone line.	141
	No auto answer	1. Check the connection of telephone line. 2. Check Reception mode setting. 3. Check if machine is printing a report. (e.g.: 32 Transaction Journal, Fax Parameter List). If machine is printing a report, machine cannot receive until printing is completed. 4. If the printed document is 32nd Transaction, machine will usually print the 32 Transaction Journal automatically after printing out the document. In this case, machine cannot receive until the 32 Transaction Journal has been printed.	141 59
	Cannot transmit or receive	An information code will be shown on the display. Refer to the information code table to find out the trouble.	131
No Unit Operation	No unit operation	To reset the machine, turn-off the Power Switch for a few second then turn-on again.	

Troubleshooting

Information Codes

When something unusual occurs, the display may show one of the Information Codes below. These will help you to identify and correct the problem.

Info. Code	Meaning	Action	Page
001/002	Recording paper jam.	Remove jammed paper.	133
010	No recording paper.	Load the paper.	18
011	Recording Paper Cassette is not installed properly.	Install the Recording Paper Cassette.	-
030	Document misfeeding.	1. Reload the document properly. 2. Remove document jam. 3. Adjust ADF.	40 134 137
031	Document paper is too long or jammed. Document length exceeds 78.8 inches (2 meters).	1. Reload the document properly. 2. Remove document jam.	40 134
041	Out of toner.	Replace the Toner Cartridge.	16
045	Toner Cartridge is not installed.	Install the Toner Cartridge.	16
060	Printer Cover is opened.	Close the Printer Cover.	-
061	ADF Door (Document Return Guide) is opened.	Close the ADF Door.	-
400	During initial handshake, receiving station did not respond or communication error occurred.	1. Check with other party. 2. Reload the document and send again.	-
401	Remote station required a Receiving Password to receive the document. Remote station does not have Confidential Mailbox.	Check the remote station.	-
402	During initial handshake, communication error occurred.	Reload the document and send again.	-
403	No polling capability at the remote side.	Ask remote side to set "POLLED=ON".	-
404/405	During initial handshake, communication error occurred.	Reload the document and send again.	-
406	Transmission Password does not match. Receiving Password does not match. Received from an unauthorized station in Selective Reception mode.	Check the password or the telephone number in One-Touch or Abbreviated station.	91 93 94
407	No confirmation from the receiving station for the previous page sent.	Wait a few minutes and send again.	-
408/409	Remote side confirmation of previous page is illegible.	Wait a few minutes and send again.	-
411	Polling password does not match.	Check polling password.	67
412	No data from the transmitting side.	Check with the other party.	-
414	Polling password does not match.	Check polling password.	67
415	Polling transmission error.	Check polling password.	67

Troubleshooting

Info. Code	Meaning	Action	Page
416/417 418/419	Received data has too many errors.	Check with the other party.	--
420	Machine goes to receiving mode, but receives no command from the transmitting side.	1. Remote side misdial. 2. Check with the other party.	--
422/427	Interface is incompatible.	Check with the other party.	--
430/434	Communication error occurred while receiving.	Check with the other party.	--
436/490	Received data has too many errors.	Check with the other party.	--
456	<ul style="list-style-type: none"> Unit received a confidential document or was requested to be polled of a confidential document under any of following conditions. <ol style="list-style-type: none"> Memory does not have enough space to receive the confidential document. Confidential Mailbox file is full (10 files). While printing received document. Unit was requested to relay a document. 	1. Printout File List then check the contents. 2. Wait a moment until finishing the printing.	76
492/493 494	Communication error occurred while receiving.	Check with the other party.	--
495	Telephone line disconnected.	Check with the other party.	--
540/541 542 543/544	Communication error occurred while transmitting.	1. Reload the document and send again. 2. Check with the other party.	--
550	Telephone line disconnected.	Check with the other party.	--
552/553 554/555	Communication error occurred while receiving.	Check with the other party.	--
623	No document was on the ADF.	Reload the document and send again.	--
630	Redial was not successful due to a busy line or no response from the called station.	Reload the document and send again.	--
631	During dialling, STOP was pressed.	Reload the document and send again.	--
634	Redial was not successful due to a busy line or no response from the called station.	Reload the document and send again.	--
638	Power failure occurred during the communication.	Check the power cord and plug.	20
870	Memory overflow occurred while storing documents into memory for transmission.	Transmit documents without storing into memory. Order additional memory option.	50
879	Memory overflow occurred while receiving documents into memory. Receiving documents with data that is greater than the memory size.	1. Check recording paper and toner cartridge. 2. Install Optional Memory Card.	16 18
975	DRAM parity error. The document information in memory is lost.	1. Unit will print out a Power Failure Report. 2. Resend the lost document.	127

20002 Clearing a Recording Paper Jam

50014

If the recording paper becomes jammed in the machine, the display will show an Information Code 001 or 002.

To clear the jam, Info. Code 001

50031

① Remove the Paper Cassette.

Caution: To prevent dropping the cassette, hold it by the front and side while pulling it out.

② Remove the jammed or wrinkled paper and reload the recording paper into the paper cassette.

Caution: Make sure paper is set under the clips and does not exceed over the red line on the Paper Width Guide.

To clear the jam, Info. Code 002

50032

① Open the Printer Cover.

② Remove the jammed paper.

Troubleshooting

20003 Clearing a Document Jam

50004 If a document becomes jammed in the machine, the display will show the Information Code 031.

To clear the jam

① Remove the Recording Paper Tray.

② Open the Document Return Guide.

Remove the jammed document.

Troubleshooting

00001

00004 Cleaning the Document Scanning Area

00005

If the receiving party reports that the received documents were black, or contained black lines, try making a copy on your unit to verify. If the copy is black or has black lines, the document scanning area is probably dirty and must be cleaned.

To clean the scanning area

1

① Remove the Recording Paper Tray.

② Open the Document Return Guide.

00009

2

Wipe the scanning area gently with a soft cloth or gauze wet with isopropyl alcohol. Be sure to use a clean cloth, the scanning area can be easily scratched.

00010

Troubleshooting

Cleaning the Printer Roller

If you find toner on the back of the recording paper, the printer roller in the fuser unit is probably dirty.

To clean the printer roller

1

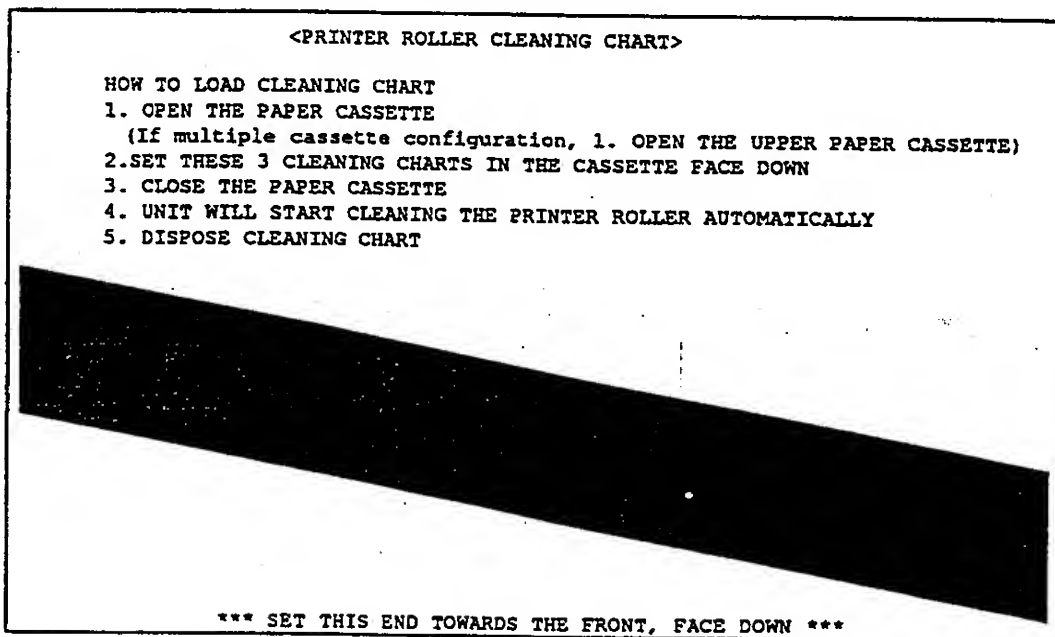

SET MODE (1-6)
ENTER NO. OR A V

2

PLEASE WAIT FOR
PRINTOUT TEST CHART

Machine will print out 3 pages of the Cleaning Chart.

After printing the Cleaning Chart, the following message will appear.

LOAD CHART IN PAPER
CASSETTE FACE DOWN

3

Remove the paper cassette from the machine. Then, load the Cleaning Chart into the cassette face down. (See Note)

4

Re-install the paper cassette. Machine will automatically feed out the charts in order to clean the printer roller.

* CLEANING *
PRINTER ROLLER

* CLEANING *
COMPLETED

Note: If you have installed the optional 2nd cassette, load the Cleaning Chart into the upper cassette.

300001

Troubleshooting

320006 Adjusting the Automatic Document Feeder (ADF)

350007 If document misfeeding occurs frequently, we suggest you to adjust the ADF.

To adjust the ADF,

1

360015

① Remove the Recording Paper Tray.

② Open the ADF Cover.

2

60016

Slide the green Pressure Adjusting Lever to the desired position depends on the condition.

Position	Condition
1	To prevent no feed trouble
2	Standard position
3	To prevent multiple feed trouble

Troubleshooting

Replacing the Ozone Filter

To prevent the increase of ozone in the air, it is necessary to replace the ozone filter periodically. When the following message appears on the display, follow the procedure described below in order to replace the ozone filter.

REPLACE OZONE FILTER

To replace the Ozone Filter,

1

① Open the printer cover.

② Remove the toner cartridge.

2

Grasp the Ozone Filter (green) by the handle and lift up to remove it.

3

Slide the new Ozone Filter all the way into the bracket and push down on the handle to lock it in place.

Note: Your machine will operate normally even if the message is shown on the display.

Troubleshooting

Verification Stamp

The Verification Stamp contains ink. When the stamp mark appears faded or hard to see, the stamp should be replaced or refilled with ink.

To remove the stamp

1

Remove the Document Return Tray.

2

① Open the Stamp Cover.

② Rotate the Stamp Assembly upward.

③ Remove the Stamp. Replace the stamp with a new one or refill the stamp with a few drops of the specified ink into the back of the stamp.

Note: Please contact your local Panasonic dealer to purchase a new stamp. See page 147 for order number.

Troubleshooting

Checking the Telephone Line

When you do not hear a dial tone through the telephone connected to the machine or when the telephone does not ring (No automatic receive).

1

Unplug the Telephone Line Cord from the telephone jack that was supplied by the telephone company.

2

Plug a different regular telephone into the same telephone jack.

3

Check for dial tone through the handset. If there is still no dial tone, report it to your local telephone company.

or

Call from another telephone to this number. If the telephone does not ring, report it to your local telephone company.

Recording Paper Specifications

In general, most bond papers will produce excellent results. Most photocopy papers will also work very well. There are many "name" and "generic" brands of paper available. We recommend that you test various papers until you obtain the results you are looking for.

The following table summarizes the major specifications to consider when selecting white or colored paper.

Basic Weight	60 to 90 g/m ²
Cut Edge Conditions	Cut with sharp blades, no visible frayed edges
Grain	Long grain
Moisture Content	3.7% to 5.3% by weight
Opacity	88% minimum
Packing	Poly laminated moisture-proof ream wrap
Sizes	A4 : 210 mm x 297 mm Letter : 216 mm x 279 mm Legal : 216 mm x 356 mm
Type	Cut sheet

! *Note: It is possible that paper could meet all of the specifications listed above and still not print well because of the variations in paper manufacturing. Therefore, we recommend that you test paper thoroughly before purchasing.*

Options and Supplies

Please contact your local Panasonic dealer for availability.

A. Options:

Order No.	Picture	Description	Available Models
UE-403060		Handset Kit	UF-744 UF-788
UE-403093		Printer Interface Kit	UF-788
UE-404045		PC Interface Kit	UF-788
UE-404047		V24 / ENC Interface Kit	UF-788
UE-409036		250 sheets Letter / Legal / A4 Size Paper Cassette with the Feeder Unit [2nd]	UF-744 UF-788
UE-409037		250 sheets Letter / Legal / A4 Size Paper Cassette with the Feeder Unit [3rd]	UF-788
UE-410006		Expansion IC Memory Card, 1 MB	UF-744 UF-788
UE-410007		Expansion IC Memory Card, 2 MB	UF-788
UE-410008		Expansion IC Memory Card, 4 MB	UF-788

B. Supplies:

Order No.	Picture	Description
FX-13-2P		Verification Stamp
UG-3309		Toner Cartridge
UG-4501		Ozone Filter

! Note: For some countries, the handset may not be available because of the country's regulation or specification.

3000002

Options and Supplies

3020001 Installing Memory Card

3050001

Before installation begins, make sure that there is no document file stored in the memory. You may confirm by print out a File List (see page 76). When the memory card is installed, the machine will initialize the document memory, all contents stored in the document memory will be lost.

060001

1

- ① Turn the Power Switch to the "O" (OFF) position.
- ② Remove the Memory Card Cover.

060002

2

- ① Insert the Memory Card into the card slot with the Panasonic logo facing out.
- ② Re-install the Memory Card Cover.

60003

3

Turn the Power Switch to the "I" (ON) position. Print out the Fax Parameter List (see page 126) and confirm the memory size on Fax Parameter No. 53. (see page 37)

Glossary

90001	ABBR. No. (Abbreviated Number)	The ability to store full phone numbers into the dialer and then utilizing a short series of keystrokes to speed dial that number in the future.
90002	ADF (Automatic Document Feeder)	The mechanism that delivers a stack of document pages to the scanner one page at a time.
90003	Automatic reception	The mode that allows you to receive fax documents without user intervention.
90004	Auto print reduction	The method of automatically reducing a received document so that it can be printed onto a standard size piece of plain paper. For example, your machine will reduce an incoming legal size page to 75% of its original size so it could fit on a letter size page.
90005	BPS (Bits Per Second)	The amount of data that is transmitted over the phone line. Your machine can start at 14,400 BPS and automatically steps down to 12,000, 9600, 7200, 4800, 2400 BPS* depending on the phone line condition and the receiving machines capabilities. [UF-744 starts at 9600BPS and steps down to 7200, 4800, 2400 BPS.]
90006	C.C.I.T.T.	Consultative Committee on International Telegraph and Telephone. This organization has presently developed four groups of industry standards that insure facsimile compatibility.
90007	CCITT Test Chart No.1	An industry standard document that allows comparisons of the transmission speeds and capabilities of facsimile machines.
90008	Character ID	A programmed proprietary code name that allows up to 16 alphanumeric characters identifying your facsimile machine.
90009	Character keys	The keys that are used to enter letters and symbols for various programming functions.
90010	Coding scheme	The data compression method used by facsimile machines. Your machine utilizes Modified Huffman (MH), Modified Read (MR), and Modified Modified Read (MMR) coding schemes.
90011	COMM. JOURNAL	Refers to either the Communication Journal, Relay Transmission Report, or the Confidential XMT Report.
90012	Confidential communication	In a network of facsimile machines, a code can be entered to retrieve a document that is stored in memory of a designated relay station.
90013	Confidential XMT Report	The report that gives you information about the transmission of a confidential document(s) to a relay station.
90014	DDD (Direct Distance Dialling)	A telephone service that allows unassisted dialling, no operator assistance is required.
90015	Deferred polling	The ability to retrieve documents from other stations at a later time.

77990016	Deferred transmission	The ability to send documents to other stations at a later time.
77990017	Direct Dialling	The method of dialling where you enter the entire telephone number through the keypad.
77990018	Directory Sheet	The list that contains the station names that are programmed into your unit.
77990020	DTMF (Dual Tone Multi-Frequency)	Dialling method that sends a different set of frequencies for each digit of the telephone keypad. Commonly refers to touch tone dialling.
77990021	ECM (Error Correction Mode)	The ability to correct transmission errors as detected during the transmitting phone call.
77990022	End receiving station	In a relay network, the final station designated to receive the document.
77990023	FAX Access code	A 4-digit programmable code that prevents unauthorized operation of your Fax.
77990086	FAX Forward	The ability to forward all incoming faxes to the station registered in the ABBR. No. [00].
77990025	FAX Parameter List	The list that contains the home FAX parameters settings that you have programmed into your machine.
77990027	File	A task that has been stored into the memory of your unit. Examples are deferred transactions.
77990087	File Transmission	A feature that allows you to store a perpetual File (until it is erased) in the memory that can be sent to a single or multiple stations repeatedly.
77990028	Fixed print reduction	The method that allows you to determine one reduction rate, such as 75%, for all incoming documents.
77990029	FUNCTION	The control panel key that will be utilized to begin an operation or configuration of a feature.
77990030	G3 mode (Group 3)	Refers to the standards and transmission capabilities of the current generation of facsimile machines.
77990031	Group dialling	The ability to program many telephone numbers into a single station so that many locations can be dialed in sequence utilizing a single keystroke.
77990032	HALFTONE	A scanning technique to distinguish levels of gray from black and white. Your machine can detect up to 64 levels of gray in halftone mode.
77990033	Handshaking	The exchange of a group of control signals that communicate between the transmitter and receiver. These signals determine the condition at which communication can occur.
77990034	Header	A row of information that is transmitted by the sending machine and printed on the top of each page by the receiving unit. This identifies the transmitting unit and information about the transmission, such as time and date.

Glossary

990079	ITU-T	International Telecommunication Union - Telecommunication, formerly known as C.C.I.T.T.
990035	ID	A programmable address of up to 20 digits identifying your machine.
990036	Image memory capacity	This signifies the amount of memory available in your unit capable of storing pages of documents. All page units of measure are based on the ITU-T Image No.1.
990037	Individual Transmission Journal	A report that is printed by the transmitting unit stating information regarding the last document transaction.
990038	Information code	A code that is internally generated by your Fax stating a specific operational error or machine failure.
	Initial sending station	In a relay network, the station that is originating the document transmission.
990040	Journal	A report that is printed by your unit listing the last 32 transmitting and receiving transactions.
990041	Keypad	A group of numeric keys located on your control panel.
990042	LCD	Liquid Crystal Display. The display area of your machine.
990043	LOGO	Your programmed company name or identification up to 25 alphanumeric characters.
990044	Manual reception	A mode that requires operator intervention to receive an incoming document.
990045	Memory transmission	The documents are scanned into memory before actual connection to the phone line for transmission.
990046	Modem	A device that converts signals from your fax machine into signals that can be transmitted over telephone lines.
990047	Multi-station transmission	The ability to broadcast the same set of documents to a programmed number of locations.
990048	Multi-file transmission	The ability to store many files into your machines memory before actual telephone connection occurs.
990049	Network address	An individual 4-digit addressing number assigned to a One-Touch/Abbreviated number that identifies a particular station in a relay network.
990050	Network password	A 4-digit password assigned to a network address to prevent unauthorized stations from accessing a relay station.
990051	Off-hook dialling	The direct dialling of a telephone number with the handset out of the cradle or "off the hook."
990052	On-hook dialling	The direct dialling of a telephone number with the handset in the cradle or "on the hook."

Glossary

990053	One-Touch dialling	The ability to dial an entire telephone number by pressing one key.
990054	ORIGINAL	Signifies the scanning sensitivity in terms of lightness and darkness of your original transmitting pages.
990055	Panasonic Super Smoothing	An electronic image enhancement (Panasonic Super Smoothing) that will create a particular pattern for the improvement of copy quality.
990056	Polling	The ability to retrieve a document from another facsimile machine.
990057	Polling password	A 4-digit programmed code that enables the security of a document being polled.
990058	Power Failure Report	A report that contains information on the last transaction that took place during a power outage. (UF-788 will print this report only when the memory back-up battery has been dis-charged.)
990059	Print reduction modes	The methods used to determine how an incoming document will be reduced to print onto the paper loaded in your machine.
990060	Program keys	Keys that are defined for storing a sequence of stations to be dialed or polled.
990061	PSTN	Public Switched Telephone Network. Network of interconnected switching equipment and transmission facilities.
990062	Receiving password	A 4-digit password that is checked before a document is received.
990063	Relay station	A certain type of facsimile machine that can store and forward documents to an end receive station and/or a relay station in another relay network. Your machine can not be used as a relay station.
990064	Relay network	A group of facsimile machines that communicate via a relay station.
990065	Relay Transmission	Sending a document to a relay station, which in turn, sends the document to the end receiving station.
990066	Relay Transmission Report	A report that contains information regarding the last document transmission to a relay station.
990067	Relay address	A 2-digit code that identifies your machine is programmed in a relay network.
990069	RESOLUTION	Relates to the number of dots scanned or printed per certain square. The quality of the image increases as the number of dots per certain square increases.
990070	Selective reception	A function that can be set so that your unit will receive from only those machines programmed into your dialer.
990071	Stored documents	Documents that have been scanned and now are stored in your machine's memory.

Glossary

- 0072 **Substitute memory reception** Your machine's ability to store an incoming document into its memory, when it runs out of recording paper or toner.
- 0073 **Transmission reservation** The ability to preset a telephone number so that you may reserve a transmission while your unit is performing another function.
- 0074 **Transmission password** A 4-digit password that is checked when a document is transmitted.
- 0076 **User parameter** Programmed parameters that provide information to other stations. Examples are logo, character ID, date and time.
- 0077 **Verification stamp** A user selectable transmission verification stamp can be placed on scanned documents that are successfully transmitted.

Facsimile Number Directory

Name

Number

This image shows a single page of white paper with horizontal black ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

QUICK GUIDE UF-744/UF-788

How to Set Documents.

Set the documents face down and adjust the document guides.

You can set the documents on the ADF (Automatic Document Feeder) up to 50 pages* at one time.

*: (Based on 75 g/m² (0.12 mm) weight A4 size document)

*: (UF-744 : up to 30 pages)

The display message is as shown below when the documents are set properly.

DOCUMENT SET
ENTER STATION(S) 00%

How to Send Using Manual Dialling.

Set the documents face down.

Enter the telephone number.

START

The document is stored in memory. Then, your machine starts dialling.

How to Send Using One-Touch/Abbreviated Key.

Set the documents face down.

or

+

Enter a 2-digit code (00 to 99).

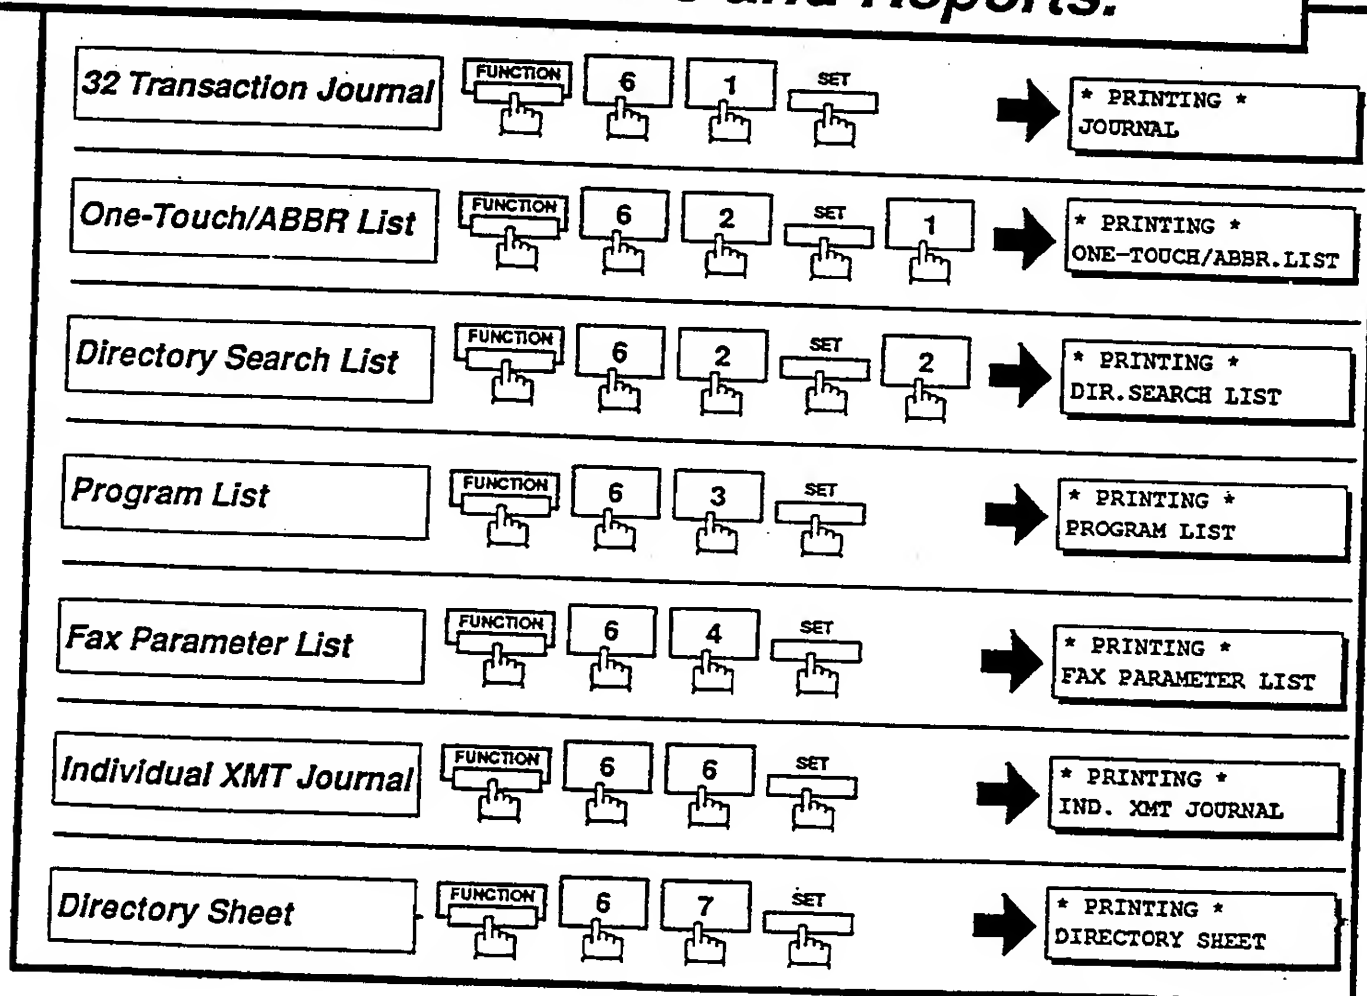

START

The document is stored in memory. Then, your machine starts dialling.

How to Send from ADF (without storing into memory).

How to Print Journals and Reports.
